

## Northern York County School District

## Curriculum Overview

Grade Level: 9-12         Approval Date: March 2023         Course Description:         This course is the pre-requisite course for all other graphic design related courses.         This half-year entry-level course introduces students to the essential elements of graphic design using Adobe Illustrator & Adobe Photoshop. Students are introduced to the seven elements of graphic design, shapes, and font typography. Students learn to select, cut, and blend photographs and images in Adobe Photoshop. Students are taught to creatively communicate their vision and/or message professionally. Students will enhance their creativity through hands-on learning, design, and production.         Course Objectives:       • Students will know and apply the seven elements of the graphic design process.         • Students will know and use non-fiction reading strategies to improve their technical reading skills.         • Students will use Adobe Photoshop at an introductory level.         Related Standards:         Pennsylvania Technology and Engineering Standards         Design & Technology         • Apply a broad range of design skills to a design thinking process.         • Implement and critique principles, elements, and factors of design.         • Optimize a design by addressing desired qualities within criteria and constraints while considering trade-offs.         • Safely apply an appropriate range of making skills to a design thinking process.         • Implement and critique principles, elements, and factors of design.         • Introduction to Graphic Design <td< th=""><th colspan="3">Course: Introduction to Graphic Design</th></td<>	Course: Introduction to Graphic Design
