

## GRADE THREE - SCIENCE ACTIVITIES

Thank you so much for taking the time to learn at home! These activities are not required, but we know our Team 3 Learners are leaders, so here we go! Record your work in the notebook sent home on Friday, 3/13/2020.

Please include a heading and date on each notebook page/task you chose to do. We cannot wait to reflect back on the many discoveries and learning experiences you made while away!

-Team 3

### SCIENCE PRACTICE

- **Structures of Life**

- It's springtime! Plants are starting to grow! Do you notice any buds on trees, stems poking through the soil, or new growth in your backyard? Check back every day and record your observations in your journal! Make a prediction of what is growing!

- **Water and Climate**

- Observe weather over a number of days (date, time, temperature, wind speed, condition, precipitation, etc.) and note these observations in your notebook
  - Create a graph to show your data
- Water is essential for life. Water is used in the preparation of a lot of food. Look around your kitchen. What food preparation requires water? Hot water or cold water? How much water? Share your findings with an adult in your house.
- Think about the seasons and our climate. Research ways that you can make a room and/or house more energy efficient. Then, in your notebook, write down your ideas and design a house that would be more energy efficient.
