

# HOME LEARNING

## choice board

Choose a reading, writing, and math activity to do each day. Don't worry about crossing off after you have finished. You can do these activities multiple times!

Reading	Writing	Math
Read a book to a sibling or parent. Or read a book out loud to a stuffed animal.	Think of a would you rather question. (Example: Would you rather eat tacos or pizza?) Then write your response. Remember to have an introduction, 3 detail sentences, and a conclusion.	Count the change you have in a piggy bank. Or draw a piggy bank with coins to count.
Read a story. Draw a picture of the main character. List their inside and outside character traits.	Draw lines on a piece of paper to make a comic strip. Then fill in the boxes with pictures and speech bubbles to create a scene.	Think of a common game. (Example: board games, go fish, memory match, or bingo) Create a math fact game. (Math fact examples: $4+8$ or $13-6$ ) Then play the game with a family member.
Read a book. Write down words you may not know the meaning to. Look up the words in a dictionary or online to learn the meaning.	Fold three papers in half and staple them to create a book. Write a story that has a beginning, middle, and end.	Write your own story problems and solve them. Example: Bob found 27 shells. Then he found 45 more shells. How many does he have now?
Choose a phonics pattern. Then read a book and write down the words that follow that pattern. Possible patterns to choose from: silent-e, ee, ea, ai, ay, ew, ue, ui, oo, ow, ar, or, ore, er, ir, ur, air, are, ear, ou, ow, oi, oy.	Draw a random shape. Give the shape features like a mouth, eyes, arms, and legs. Write about your new character. What do they look like? How would they act if you met them?	Make place value riddles and solve them. Example: This number have 4 hundreds, 5 tens, and less ones than tens. What could the number be?
