Central Nervous System!
The control center of the body
Brain
Spinal Cord
Controls?
Most functions in the body
Is made up of
cerebrum
cerebellum
brain stem
Function?
Function?
Function?
Serves as the link between?
Your brain and the peripheral nervous system
Interprets sensory input
Controls movement
Memory
Personality
Coordinates action of muscles
Helps maintain balance
Controls involuntary actions
Regulates breathing
Controls heartbeat
Peripheral Nervous system
Network of nerves that connect your CNS to the rest of your body
Concussion?
Bruising of the brain that occurs when it collides with the skull
Split into two main groups
Somatic Nervous System
Controls voluntary actions
Autonomic Nervous System
Controls involuntary actions
