Cellular Organzation:
How cells work as a team
to make up an organism
Cell:
Basic Unit Of all Living Things
Muscle Tissue:
Contracts in order to
help move the organism
Connective Tissue:
Gives support and
connects all the parts
Tissue:
A group of cells that work together to
perform the same job
Nerve Tissue:
Carries messages from the
brain/spinal cord to the body
Epithelial Tissue:
Provides a protective
layer for the body outside
and inside
Organ:
A group of tissues that cooperate for the
same job
Organ System:
A group of organs working together to perform
the same job
Organism:
A group of organ systems work together to make up the
entire organism
